WORLDWIDE DATA RECOVERY

When you  
Absolutely, Positively,  
**have** to get it back.

*Over 20 Years Experience*

Your data exist physically, as magnetic impressions recorded in a microscopically thin, unbelievably delicate coating on the surface of each disk, spinning at high speed inside your hard drive.

"Not only are you folks technical wizards, but your customer service was compassionate, informative, and... just perfect!"

— Dr. Susan Berk, Encino, California

"Many thanks to your team on the recovery of the RAID-5 data. This was crucial to our client's defense. We first tried a larger national service who was not successful."

— Robert Pallasch,  
ACT Litigation Services

*Saving data is our only focus . . .*

It's our only business. Every day we recover computer data for people under considerable duress. Our technological forté is the hard disk drive. We are expert and seasoned by years of experience, technology innovation and emergency service. Lost files that can no longer be accessed — are the target of our enduring enterprise. If your data still exists . . .

*we will get it back!*
